Comparison of Questionnaire/Poll Functions

APU Moodle is equipped with four types of questionnaire/poll functions.
Please choose the function that suits your needs.

Function	Questionnaire	Feedback	Poll	Live Poll
				Refer to the manual for poll functions
Features	Create advanced questionnaires combining various question formats	Set simple questions and create questionnaires	Create simple questionnaires with only one question	Set questions and display responses in real time
Estimated Time to Answer	Approx. 5 to 30 minutes	Approx. 5 to 30 minutes	Approx. 1 to 5 minutes	Immediately
Example of Use	Conduct a questionnaire about students' academic history and overseas experience before the start of English courses to gauge their English proficiency	Conduct questionnaires to survey students on various topics, including comprehension of class or course content and professor evaluations	Ask students how well they understood the content after each lecture on a 5-point scale from "understood well" to "did not understand at all"	Encourage students' participation in class by setting simple multiple-choice quizzes and questionnaires during class
Question Type	Multiple choice / Essay	Multiple choice / Essay	Multiple choice only	Multiple choice only

If the Questionnaire is hidden, this message will be displayed on the course's top page.

Hidden from students

Common module settings

Availability	You can select either "Show on course page" or "Hide on course page". If "Hide" is selected, then students will not be able to view the Questionnaire until you change the setting to "Show"	
ID number	You can set an ID number for the activity (to help identify different teaching materials) This setting is generally left blank and not used	
Force language	This setting allows you to force all students to view the activity in a set language	
Group mode	No groups	Everyone registered for the course can access the Questionnaire
	Separate groups	Students can only use the Questionnaire within their own groups. Students cannot see the work of other groups
	Visible groups	Students can only use the Questionnaire within their own group, but they can also see the work of other groups
Grouping	You can enable this setting if you have set up groupings (collections of groups) in the course	
Add group/grouping access restriction	You can add access restrictions by group from the "Restrict access" section below *You can only set up group access restrictions if you select one of the group settings under "Group mode" above	

(Common Functions) Restrict access

Restrict access

Restrict access	
Activity completion	Require students to complete a separate activity in the course to be able to access this activity E.g. 1: Students cannot access the activity unless they have completed a specified Survey E.g. 2: Students cannot access the activity unless they have completed a specified Assignment
Date	Set when students can start accessing the activity (the date and time it will appear in the course) and when they will lose access (the date and time it will be hidden from the course)
Grade	Use this setting if you want to require students to achieve a set grade in a separate Assignment or Quiz within the course in order to access this activity
Group	Only allow students who belong to a specified group or students who don't belong to that group to access the activity
Grouping	Only allow students who belong to the groups included in a specified grouping (collection of groups) to access the activity.
Other course completion	Use this setting if you want to require students to complete another course in order to access the activity (This setting is not recommended)
User profile	This setting allows you to limit access to specified students E.g. Only allow students with specified student ID numbers to access the activity
Restriction set	Use this setting if you want to use several of the above settings to set complex access restrictions for the activity

☐ Send content change notification

Activity completion
This setting allows you to check if students have accessed an activity. When enabled, a checkbox will appear underneath the activity on the course page. The checkbox will be marked complete when the student meets various customizable conditions, for example, when the student views the class materials. Furthermore, with this setting, instructors can check which students have viewed which teaching materials and keep track of students' progress for the entire course.

| Completion tracking	
Do not indicate activity completion	Students will not see a checkbox to indicate activity completion on the course page
Students can manually mark the activity as completed	Students can mark the activity as complete manually by themselves. Please use this setting if you want students to manage their own learning progress
Show activity as complete when conditions are met	The activity will automatically be marked as complete if the student meets one of the set requirements from the list below. Please use this setting if you want to track students' progress as the course instructor

Require	
Student must view this activity to complete it	If selected, the activity will be automatically marked as complete when the student views the assignment (after submission or after grading is complete)
Student must receive a grade to complete this activity	The activity will be considered complete and automatically be marked as so after the instructor finishes grading
Student must receive a passing grade to complete this activity	The activity will be automatically marked as complete after grading only if the student receives a passing grade
Or all available attempts completed	The activity will be automatically marked as complete when the student submits the assignment, etc.

Manually mark as complete

(Reference) Setting Up Branching Questions

You can set up branching questions based on students' responses to other questions (multiple-choice), e.g. adding extra questions, etc.

Set up either "Mandatory" or "Optional" dependencies

Use this option if you want to make sure that the question will be displayed if the student has chosen these answers
E.g.) Settings for showing the question if students have responded "Q1: Yes, Q2: No":
(Do not display the question if the answer to Q1 was Yes, but the answer to Q2 was also Yes)

Use this option if you want the question to be displayed if the student has chosen either answer
E.g.) Settings for showing the question if students have responded "Q1: Yes, Q2: No":
(Display the question if the answer to Q1 was Yes, even if the answer to Q2 was also yes)

If you select "Yes," the "Dependencies" options will be shown on the settings page for each question
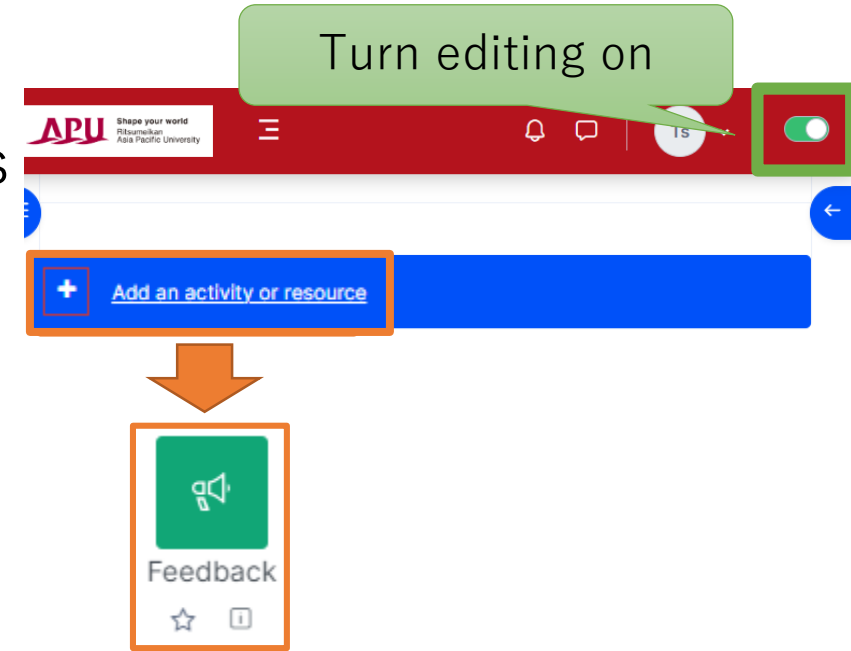

Make sure to "Save changes" after inputting the settings

Feedback Overview

- What you can do with Feedback (example)
  - Simple questionnaire for asking multiple questions
  - Questionnaires with both multiple-choice and essay-style questions
  - Anonymous responses, sharing results, etc.

- Select "Feedback" from "+Add an activity or resource"

- Overview of Using Feedback

| (Professor, TA) Create and set up the Feedback | → | (Professor, TA) Set the questions and share the Feedback with students | → | (Students) Respond to the Feedback | → | (Professor, TA) Check the Feedback's results |

Question | **Question Text**

Use this setting if you want to itemize questions or if a different question will be shown next depending on the answer to this one. The character you input here will be shown before the question in brackets.

Label | 1

Multiple Choice Type	
Single answer	Can only select one answer
Multiple answers	Can select multiple answers
Single answer allowed (Drop-down menu)	Can only select one answer

Multiple choice type | Multiple choice - single answer

(1) Multiple choice-single answer | Edit ˅ ○ 1 A/あ ○ 2 B/い ○ 3 C/う

(1) Multiple choice - multiple answers | Edit ˅ ☐ 1 A/あ ☐ 2 B/い ☐ 3 C/う

Adjustment | Horizontal

Direction for displaying response options

Hide the "Not selected" option | Yes

(1) Multiple choice-(drop-down) Edit ˅

1 A/あ
2 B/い
3 C/う

Select "Yes" if you don't want to include "Not selected" as a possible answer

Omit empty submits in analysis | No

Do you want to exclude "not selected" responses (if this option is enabled) and responses without any answer selected from counting towards the no. of responses?

Multiple choice values | 1 A/あ 2 B/い 3 C/う

Input options here

Write each option on a new line
If you are asking students to evaluate something, write the score and option on the same line using /
(E.g.) "1/1　A/あ","0/2　B/い", etc.

【Note】 Please use the "Add a page break" option explained in the table on the previous page to input a page break between Question (A) and Question (B). After answering the first question, the page will change, and students won't be shown questions they do not need to answer (e.g. Question (C) aimed at students who answered (No)). Without a page break, students will be shown all the questions (both (B) and (C) in this scenario), and if they are required questions, students will not be able to submit the questionnaire unless they answer all questions (both (B) and (C)).

Use one line for each answer!

Dependence item ⑦ | 1

This option is displayed if you have set up labels for other questions. Select the label for the question this one depends on and input the response to the original question that determines students are shown this question.
(E.g.) You are creating branching questions that depend on students' response (Yes/No) to Question (A) and you want students who answer (Yes) to be taken to Question (B), which is the question you are currently creating. In this case, you should select the label you assigned to Question (A) from the drop-down list.

Dependence value |

Position | 1

Chose the item's position in the questionnaire's order

This option is only shown if you have selected a label above. Input the response option that this question depends on.
(E.g.) Input the response option from Question (A) that branches to this question. Students who select the answer input here for Question (A) will be shown Question (B) (the question you are currently creating) next.
